Anil Singhvi, Chairman of the Company said "During the quarter, SDCC took a major plant overhaul exercise for enhancing the plant productivity. Post major plant overhaul, clinker production has improved considerably, we produced **highest ever** clinker of 93,324 tons in October'20.

I am also pleased to share that company has recently secured new limestone mines, mitigating an area of concern for many years. With these additional mines, it has sufficient limestone reserves for more than 20 years.

Both these steps will augur well for further increase in production of cement and market share of Kamal Brand."

Rajeev Nambiar, CEO and Managing Director of the Company said "Despite of COVID-19 crisis Cement Industry is poised for faster growth. The demand is very encouraging and SDCC is fully geared up post major plant overhaul executed in quarter ended September 2020. It was encouraging to see a growth in sales volume in the midst of a challenging time and the Company expects to deliver improved profitability in the coming months.
